

UniPanel®

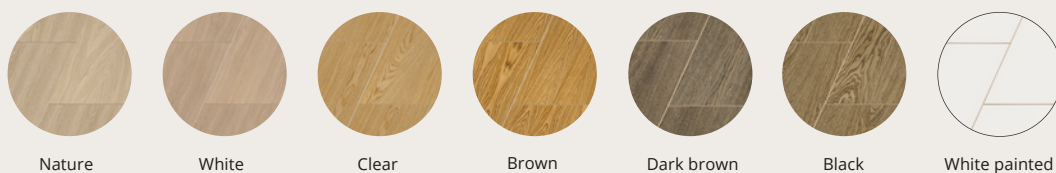

Nordic design and functionality

The new UniPanel® from I-Wood Denmark® has been developed with a focus on easy and simple installation, making them the ideal choice for both professionals and private individuals. The chamfered tongue and groove edges not only ensure a precise joint, but also elevate the joint to a visual design element that stands out.

DivideWall

Natural and stylish room division

I-Wood Denmark®'s DivideWall is a stylish and functional room divider, consisting of vertical slats that are installed per. every 100 mm on the top/bottom profile. By installing a DivideWall you can create a visual division of the room while maintaining a feeling of openness and light.

"The new slatted walls from I-Wood Denmark® are an obvious alternative to the otherwise popular New Yorker walls. Because we want to bring wood and nature back into the interior design."

- Lis Foged, interior designer Stylishit
